How to print flowsheets in epic

If you are unable to print a certified copy of the patient's demographic and resort to printing a screenshot, we can have a solution for you! but we can't take the credit. this was brought to our attention by stefania and roan of the head and neck team. Thank you! Note: This function cannot be available for all epic departments. if you have any questions, please email dsmc-quality@stanford.edu steps for demographic printing from epic 1. find your patient in epic 2. find and click snapshot on the menu on the left side of screen 3. in the search field, enter patient demographics and press enter 4. Printing! Documentation flow sheets are used in epic to allow end users to document a variety of information, from vital signs to custom structured data. you can use an epic flow sheet to document almost any type of information. within epic, a flow sheet entry is only a part of a meeting. Also in that meeting could be known, orders, charges and smartform documentation. just to name a few. users generally should look at the entire summary of the meeting to get a full picture of what happened during the course of a meeting. However, there may be times when you want to pull the values of a flow sheet entry into your note. in this article, we will see how to do this. *Update - next to an epic version near you* it seems that epic has released an update that allows users to select the flo values more easily to pull in a smartlink! to do so, just enter (without quotations) .flow and you will be brought to a new window that makes the search and entry of the flow sheet values into a very easy smartlink. determine the FLO(s) id until you have the update (seeHe stuck looking for the old FLO ID. In order to insert a set of flow sheet values into a SmartLink, you must first determine the FLO ID. To do so, you can use the Report & Print Group Assistant tool to reveal the Print Group debug tool. Go to the epic at the epicHelp Desk Reports Enable the Report and Assistant of the Press Group Or, you can simply be able to search Report/HTML Support in the search bar at the top right. Now that the Assistant is on, you can go to the desired pattern of the flow sheet in the flow sheet editor. Open a test patient in any type of encounter to access flow sheets. If you access the flow sheet from a navigator section, you can close the section and click Edit in the Doc flow sheets to open it. Then, select the row/group you want to pull into the SmartPhrase/Link. Make sure that the collapse arrow is open, so that you can see the right pane where the input of the flow sheet is. Also make sure the bottom pane is open, so you can see the flow sheet row ratio. Scroll down in this report until you find the "debug printing group". In this section, you should see something that says "FLO ID". This is the ID of the row/group of the flow sheet you want to insert into the SmartPhrase. Add the SmartLink to a SmartPhrase Now, you can add a SmartLink using the values of these FLO IDs to a SmartPhrase. Choose an existing SmartPhrase or create a new one. Add the following to SmartPhrase: FLOW(12345,12346,12347) Where 12345,12346,12347 is a string bounded by FLO ID comma that you want to insert in the SmartPhrase. If you are unable to print a certified copy of the patient's demographic and resort to printing a screenshot, we can have a solution for you! But we can't take the credit. This was brought to our attention by Stefania and Roan of the Head and Neck team. Thank you! Note: This function cannot be available for all EPIC departments. If you have any questions, please email dsmc-quality@stanford.edu Steps fordemographic by EPIC 1. Find your patient in EPIC 2. Find and click SnapShot on the menu on the left side of screen 3. In the search field, enter PATIENT DEMOGRAPHIC and press ENTER 4. Print! Documentation Flowsheets are used in Epic to allowusers document a variety of information, from Life Signs to custom structured data. You can use a flow sheet in Epic to document almost any type of information. Within Epic, a flow sheet entry is only a part of a meeting. Also in that meeting could be known, orders, charges and documentation of SmartForm, just to name a few. Users generally should look at the entire summary of the meeting to get a full picture of what happened during the course of a meeting. However, there may be times when you want to pull the values of a flow sheet entry into your note. In this article, we will see how to do this. *Update - Next to an epic version near you* It seems that Epic has released an update that allows users to select FLO values more easily to pull in a SmartLink! To do so, just enter (without quotations) ".FLOW", and you will be brought to a new window that makes the search and entry of flow sheet values into a very easy SmartLink. Determining the FLO(s) ID Until you have the update (see above), you are stuck looking for the FLO ID old way. In order to insert a set of flow sheet values into a SmartLink, you must first determine the FLO ID. To do so, you can use the Report & Print Group Assistant tool to reveal the Print Group debug tool. Go to the Epic Help Desk Reports button Enable Report and Print Group Assistant or, you can simply be able to search Report/HTML Support in the search bar at the top right. Now that the Assistant is active, you can go to the desired Flowsheet model in the Flowsheets editor. Open a test patient in any type of encounter to access flow sheets. If you access the flow sheet from a section of theYou can close the section and click edit in doc flow sheets to open it. Next, select the row/group you want to pull into your SmartPhrase/Link. Make sure that the collapse arrow is open, so that you can see the right pane where the input of the flow sheet is. Make sure that the bottom paneopen, so you can see the flow sheet row report. Scroll down in this report until you find the "debug printing group". In this section, you should see something that says "FLO ID". This is the line ID/flow sheet group you want to insert into the SmartPhrase. Add the SmartLink to a SmartPhrase Now, you can add a SmartLink using the values of these FLO IDs to a SmartPhrase. Choose an existing SmartPhrase or create a new one. Add the following to SmartPhrase: "@FLOW(12345,12346,12347)@" Where 12345,12346,12347 is a string bounded by FLO ID comma that you want to insert into the SmartPhrase.
