The PIXMA PRO100 Wireless 1 Professional Inkjet Printer possesses the functionality and technology you need to achieve high quality output so your prints can look as good as the images you capture. The PIXMA PRO100 shares technology with the rest of the PIXMA PRO line utilizing the Optimum Image Generating System to ensure what you envision is exactly what you get. The OIG System analyzes each area of the print and chooses the best ink mixture so you see the colors you expect to see in your print.

The new Print Studio Pro 2 plugin software makes it even easier to get amazing results from your favorite photo applications. Add to that connectivity options like WiFi, Ethernet and USB and you have a professional machine that easily fits into your workflow that you can place anywhere around the studio. For media support, the PIXMA PRO100 features two paper trays. A rear tray for a variety of fine art and glossy photo papers, and a manual slot for thicker media to meet your printing needs. The Optimum Image Generating System reproduces colors as you intend them by logically selecting the optimum ink combination and placement. Print Studio Pro Plugin software 2 offers a seamless and stress free photo printing workflow for professionals. 4800 x 2400 dpi 3 with FINE technology for incredible detail. These inks deliver enhanced, deep black density to raise your level of professional print quality when creating the dramatic expression of grayscale photography. Uniform Ink Height The Chroma Optimizer brings uniform ink height over the printed image and regulates surface reflection. This maintains the natural color and integrity of your printed photos. Optimum Analysis and Mixture of Color The Optimum Image Generating OIG System utilizes two major technologies that were first introduced in the PIXMA PRO1. The first is a sophisticated mixing balance of inks determined from numerous ink combinations and advanced analysis. During this analysis, the OIG System carefully calculates the best results for each print mode and paper type used while looking at various image factors including color reproduction, tonal gradations, black density, and low graininess. These critical ink balancing principles are derived from Canons expertise in imaging technology, as well as the familiar colors of life that people see and remember on a daily basis. The second is the balancing of color reproduction, tonal gradations, and uniform glossiness.

The genius and power of the OIG System is truly showcased when your image is printed, exhibited, and is seen exactly as you envisioned it. Pro Printing The powerful Print Studio Pro plugin software 2 provides professional photographers effective printing solutions and can directly handover image data. Print Studio Pro is compatible with Digital Photo Professional ver 2.1 or later, Adobe Photoshop CS, Adobe Photoshop Elements, and Adobe Photoshop Lightroom. Versatile Paper Handling Two way paper feeding provides a rear tray for most supported media types and a dedicated manual feed in the back of the printer for easy loading of thicker papers. Builtin CD and DVD Printing Conveniently print onto your printable CD, DVD or Bluray Discs and jackets. Builtin WiFi The builtin WiFi 1 gives you the freedom to place the printer where it's convenient and allows multiple users to seamlessly print from several computers. AirPrint Enables you to print photos, email, Web pages and documents from your Apple device directly to your printer without installing a driver. 4 Computerfree Printing A PictBridge connection lets you print photos directly from your compatible digital camera, DV camcorder, or camera phone. Computerfree Printing A PictBridge connection lets you print photos directly from your compatible digital camera, DV camcorder, or camera phone. HiSpeed USB Plug the cable into your PC for a superfast connection for your data transfers. Wireless performance may vary based on terrain and distance between the printer and wireless network clients. Printer firmware update may be necessary for AirPrint function. Certain exceptions may apply. A PC running Windows XP or later or A Mac running OS 10.5.8 or later and

USB cable required to perform firmware update. AirPrint functionality requires an iPad, iPhone 3GS or later, or iPod touch 3rd generation or later device running iOS 4.2 or later, and an AirPrint-enabled printer connected to the same network as your iOS device.

A printer connected to the USB port of your Mac, PC, AirPort Base station, or Time Capsule is not supported. Based on accelerated testing by Canon in dark storage under controlled temperature, humidity and gas conditions, simulating storage in an album with plastic sleeves. System requirements vary by application. For Mac OS, an Internet connection is required during software installation. For Windows OS, .NET Framework 4 is required to install My Image Garden and Quick Menu. Photo print speeds are based on the standard mode driver setting using photo test patterns and select Canon Photo Paper. Envelopes, High Resolution Paper and certain fine art papers are NOT supported for borderless printing. Requires Canon EasyPhotoPrint for iPhone app, available for free on the App Store, or Canon EasyPhotoPrint for Android app available for free on Google Play. Compatible with iPhone 3G, 3GS, 4, 4S, iPod touch and Android devices running Android OS 1.6 or later. Please try again later. peter j. brown 1.0 out of 5 stars The end result is I have no cyan when I print though the printer still willingly prints black and white documents, but forget photos or color. Now heres the real problem. Replacement print heads for this model are almost impossible to locate. Many people are bidding. The print head is the most vulnerable part of these printers. Canon Pro 100 print heads are really hard to unclog and are outrageously over priced. Unclogging is a messy nightmare so its like winning the lottery if you are successful. It has two 2 paper feed sections, one that is sort of on top, you can put about. Next it works fine with Windows 10 and the software runs just fine. It takes it a while to warm up, that is typical of all top end printers, don't shut it off ever and you will be in good shape and it will save you some ink. Also for those that are unsuspecting this printer is massive, you should expect that with so many ink tanks and 13" wide feeding, but it is huge if you have never seen it in person. Ok, now down to the nitty gritty. Setup time from box opened to my first print was about 45 min including installing software and so forth.

The profiles for canon papers are not that bad depending on the paper, I tried Luster and Platinum Pro from there line. Luster was not that great, Platinum Pro was better. I also tried some Red River papers last night, I like them better than canon paper and there profiles are better. It feeds my 250gsm Aurora Art paper from the back feed with no problems. Print quality its self was better than my local Walgreens print center so long as you set it to fine, about on par if you set it to normal. Colors where great, purples and blues popped nicely when I was printing some MLP stuff for my

daughter, reds and organ look nice too. Black and white is much better than a standard inkjet, but yes the Pro10 and Pro1 make better black and white prints had a friend make me a couple from his studio to compare. Print time was not bad for a high end, on fine setting I hit print and go make a cup of tea, by the time I'm back the page is done. Considering I have some friends with printers that take 5 min a page, I'm pleased with the speed. The good and bad of what is in the box. Well the power cord is a good length and the documentation is not bad. The USB cord they give you is a joke, it is short, very short, only slightly longer than the printer is wide. I have not tried the tray for printing on a CD. The packaging was good and secure. Ok let's talk value. When I ordered I was arguing between a good price point and the allout performance of a Pro1. I don't print that much, some photos for my cube at my day job, some of my semipro photos that I sell on line and a little here and there for family. As such I did not feel that I could justify the price of a Pro1 and figured I would try the Pro100 and see if it met my needs. My needs are more than met. For the price point the Pro100 cannot be beat. I am more than pleased with the purchase and with the rebate it is even better. Word on the rebate.

You need to send a full copy of the receipt showing order number and that you paid, yes Amazon is an authorized retailer, it is a good idea to preregister the rebate and send the whole set of bar code and SN on the outside of the box and it runs fairly smooth. DO NOT send the upc on the inner flap, DO NOT peel the label off the cardboard, send the cut out cardboard. Hope that was helpful. You should expect a printer with this capability to be large. The 8 ink cartridges are great to have. I print black and white and having the extra gray is a nice feature. The Pixma Pro 100 is designed for those with the need or desire to print not only in color, but in true black and white. Im running this on both Sierra OS and Windows 10 and have no issues. My set up time, from box to fully operating, was 40 minutes. Thats not unreasonable as you are unpacking, removing security tape, checking for damage, reading the manual and activating. The software installed without issue. I always suggest looking for firmware and software updates. This is because software updates may be released after the device is packaged. Both have done well. There are two paper feeds, one on top, and one in the back. The 13x19s I printed took a few minutes, but I was busy preparing the next job, its no issue. The power cord is a great length, but the USB cable is rather short. I think thats because Canon assumes youll go wireless. I prefer cabling as it ensures no disruptions in the printing. I have a 6 cable I use. Quality of prints, Im extremely pleased. Take a look at the photos I included. The black and white photos are from digital images. I found the consistency of ink flow and distribution of colors was good. This is a great printer with flexibility and I recommend it. Love the photo quality, and doesnt seem to use too much ink. You better have room. No touch screen, no on board control panel. It takes up an entire folding table in our study and is very heavy.

At least twice the size other any other printer i have ever owned. The ink is expensive and complicated, but thats fine, mostly professionals will buy this so its expected. It can print huge 13 x 19 photos, and they look amazing. There is a USB port, but no SD drive port. Which doesnt really make sense, as either is useless without a screen. The paper feeder is also confusing and double layered, and theres no internal paper tray. Its all back loaded as you print. Essentially this is a professionals device and you need dedicated space and money to run it. The wireless networking works well though and was seamless. Sorry, we failed to record your vote. Please try again Where Epson L1800 is far better than this Sorry, we failed to record your vote. Please try again Ive been using this printer for many years for my business and is the best one so far. Its been working hard for me. I love that it prints large size papers. Sorry, we failed to record your vote. Please try again But prints such amazing colours and quality. Sorry, we failed to record your vote. Please try again Its fantastic, I really love it. Ink is expensive of course, but hey, Id rather buy ink than shoes, at least I can make it last. Colour quality is beautiful and its super quiet when printing, but when its warming up it tends to be a little obnoxious when Im up at 3am trying to finish my assignments and not wake my partner up. Its a little heavy, dont forget to bend your knees when you pick this sucker up. Oh

and it really does turn heads when people come to visit, shes pretty;Sorry, we failed to record your vote.
