RM Series remote control has been designed and assembled from the original remote control. The remote is assembled and checked in the UK. RM Series use the latest remote control technology chipsets to ensure the infrared codes match that exactly of the original remote control. IMPORTANT Unlike other generic replacement remotes the RM Series buttons are all 100% LABELLED correctly. Other generic replacements often have a standard button layout to save costs, with incorrectly labelled buttons and therefore needs instructions to tell what each button function is. This can lead

to confusion and constantly referring back to the manual can be highly inconvenient for the end user. RM Series buttons do exactly what they are labelled to do so no need to constantly refer to manuals and instruction sheets. The RM Series range of remote controls has been a popular choice of the professional TV servicing industry across Europe for over a decade. Unlike more generic replacements, each individual RM Series remote control is customdesigned to operate EVERY function of the original remote that they replace. The case style itself has been designed for sturdiness and reliability, whilst the buttons and text are optimised for visibility and ease of use.

To meet the demands of the servicing industry, the materials and components used within the remote are carefully specified to produce a thoroughly reliable product and undertake vigorous testing to ensure long term use. All RM Series are CE and ROHS compliant. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. We are passionate about home theater here at Sonos Playbar, and we hope you are too. You can set up your Playbase in less than 10 minutes, and get it connected to a TV. You can set up a Beam with a TV in less than 5 minutes, and the quickstart guide is a great place to start. Here is the Beam Quickstart Guide. The Beam is a lower priced soundbar than the Playbar, but has some additional features such as the ability to hook into your television through an HDMI cable.
