BROAN ventilation fans provide the best solutions to ensure that contaminants are constantly removed from the indoors. Long-lasting electrically bonded epoxy coating can be painted to match outdoor styling. Aluminum filter available, sold separately. Motor assembly offers fast, easy twistlock installation. Specially designed polymeric fan blade. Rated 1.5 Amps. 180 CFM, 6.5 Sones. HVI Certified. Built-in backdraft damper. Built-in rotary switch; no wall switch to wire. This ventilation fan does it all from eliminating humidity or stubborn odors such as tobacco or garlic, the Through-the-Wall fan has got it covered. It features a specially designed polymeric fan blade to always ensure the highest quality. It operates on 180 CFM with a 6.5 Sone rating and is powerful enough for 170 sq. ft. rooms including bathrooms. The white grilles are paintable so it can be cohesive with your existing decor and wall color. Accessorize this unit with a wall switch or variable speed wall control. <http://www.atsamuihaus.com/image/upload/cuisinart-automatic-bread-maker-manual-bmkr-200.xml>

It also features an efficient operation with a durable polymeric fan blade and permanently lubricated, thermally protected motor, moving air at 180 cubic feet per minute CFM and producing a 6.5 sone level of sound. Great for use in laundry rooms, workshops, rec rooms, and kitchens view larger. This fan has a white polymeric grille that can be painted to match your home decor, and its rugged steel housing also has an electrically bonded epoxy paint finish that can be painted to match the outdoor style of your home. An aluminum filter is sold separately. Considerations When Choosing a Home Ventilation System Homes are now built much more efficiently than they once were, making them far less costly to heat and air condition. That said, having proper ventilation throughout the home is now imperative in order to provide a safe and comfortable living environment. Broan ventilation fans provide the best solutions to ensure that contaminants are constantly removed from the indoors. Eliminating excess moisture keeps your home dry and comfortable and can help avoid mold and mildew. The lower the sone value, the more comfortable the environment. Calculate the air movement necessary for proper ventilation. Air movement is measured in cubic feet per minute CFM. To determine CFM requirements, first determine the size of your room. Measure and multiply the length, width and ceiling height of your room to determine cubic footage. About Broan NuTone In 1932, Henry Broan developed and manufactured a kitchen fan called the MotorDor Fan that provided quiet and efficient kitchen ventilation. Today, Broan NuTone leads the industry with forward-thinking residential ventilation products, customized climate, communications and storage

solutions and superior customer

service.http://www.deewanalarab.com/up_imgs/cuisinart-automatic-bread-maker-bmkr-200pc-manual.xml

While global expertise plays a critical role in BroanNuTones ability to being able to meet and exceed the needs and desires of homeowners and designers alike, BroanNuTone is very proud of the fact that over 80 percent of their products sold in the United States are designed, engineered and manufactured in the United States with U.S. and imported parts. Manufacturing operations in the United States are located in Hartford, Wisconsin and Cleburne, Texas, with customer and technical services located in Hartford and in Cincinnati, Ohio. BroanNuTone is committed to developing revolutionary products that improve the indoor environment as well as implementing procedures to preserve the outdoor environment. NuTone holds major market positions in door chimes, central vacuum systems, stereo intercom systems, home theater speakers, medicine cabinets, ironing centers, ceiling fans and ventilation fans. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Dan McDermott 1.0 out of 5 stars The original knob broke on first use and they sent a replacement. That broke on about 4th use and they are sending me another knob. We use the fan occasionally and in a residential setting so It breaks about every 10th use. Im going to take a knob to Lowes and see if they have something that will fit and not keep breaking. UPDATE The 2nd replacement knob they sent broke as well. This is a good fan wrapped in cheap, garbage plastic. For what they charge for the fan, the knob should be able to be put through normal use without breaking. The instructions were easy to understand and went together fast. This unit is louder, but I dont really mind since you can feel the suction of air being pulled outside.

I believe this fan was made for through wall installation and Im certain it would be fine. Broan is the deal and they are built well. Mine does not go to the outside. It is in my bathroom. Some people might be tempted to use a fan to remove mist from a shower room. I wouldnt unless it goes to the outside and your condensation is handled properly there. It came with a steel outlet hood to mount outside. Water might still collect on the lip of the hood and drop down to whatever. Maybe not. My bathroom has a high ceiling and not far from my bedroom, open between the rooms by a foyer. I put this exhaust fan at a high position above the entrance, and it exhausts into my attic. Never, never ever, use such a fan to pull out that steamy shower mist into a closed space like an attic. Damp wood, and damp insulation hell no! Never. This fan is for one thing. It is for when someone LIKE MY WIFE, not me uses the toilet. I dont care how the attic smells. This fan moves a lot of air, much more than a typical bathroom exhaust. Is it loud Not terribly but think of it as a car engine noise you like. I put mine on the end of a timer switch with increments from polite visit climbing 5 steps to squirrel tornado alert. While I dont leave this fan on for a long period of time due to the powerful suction i.e., I dont want it removing all the warm air in the house during the winter, it works great for removing odors and shower mist in a short amount of time and much more efficiently, in fact, than the ceiling fan in my other bath. I also bought two of Broans filters for this fan two so I would have a fresh filter to put in when I remove the other one for cleaning; I find that the filter helps keep the fan housing and blades from getting too much dust buildup, and the power button on the front of the fan seems to stay positioned better since I installed the filter. Installing it was very straight forward. Pretty easy actually if you have some skills. Otherwise call in a pro.

<https://www.thebiketube.com/acros-bosch-psb-650-re-hammer-drill-manual>

Get a look at the install directions if you arent sure of your skills. There are two issues that I have with this product. It works but it is too tight against the grill to give a decent feel. Secondly, the outside flap to this thing leaks terribly in the cold weather. I called customer service and they were

of no help. Ill find a way to seal this but that shouldnt be the consumers issue. So, all in all, if you are putting in something just to fill the preexisting hole, fine. If you want a really decent product this model leaves much to be desired. Finally, good luck in finding anything better these days. Perhaps we would all be better off if we repaired our oldest American Made things from 50 years ago than putting up with this stuff that these so-called American manufacturers market anymore. A little tricky to get the sleeve and electrical connecting box in place and secure. Had to drill a couple holes and put my own screws to make it secure in older construction. Might work perfect for normal modern construction. I appreciate the rotary switch right there to avoid needing to run a line to a wall switch. I did have to contact Broan because mine was missing a part but they sent a replacement to me quickly. Installation was easy and both the inside and outside parts feel sturdy and well made. I also had to weaken the spring that closes the damper because it didnt fully open when the fan was on. If youre concerned about the noise you might want a quieter model. Standing within a few feet of this fan makes casual conversation difficult. For this reason I dont use it as often as I would if it were quieter. It would be nice if it had multiple speeds. My house is stucco so, cutting the hole in the outside wall was the most time consuming part of the job but not difficult. I wired it directly from a nearby outlet and start to finish was about two hours. As others have stated it is not quite but not so loud that I cant run it while watching a movie.

<http://cydistribution.com/images/como-hacer-bufandas-en-telares-manuales.pdf>

My review is that it fit the bill brilliantly. It would take a lot of work and money to try and vent through the roof. My next best course was a wall exhaust. Installing this was easy enough after watching a lot of instruction videos on you tube. Ive had this installed for 3 years now and havent have any problems. Sorry, we failed to record your vote. Please try again Eight inches is just the hole that goes through the wall. The chassis and fan themselves are gigantic. I just wanted a kitchen fan. I cant use this. What am I gonna do with this frigging thing Sorry, we failed to record your vote. Please try again Performance is on point though, it sucks air like a nymphomaniac thats been deprived for a week. Sorry, we failed to record your vote. Please try again Ordered the 512N instead Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Solamente use esta unidad de la manera propuesta por el fabricante. Si tiene alguna pregunta, pongase en contacto con el fabricante en la direccion o telefono anotados en la garantia. HOMEOWNER Use and Care Information on Page 4. INSTALADOR Deje este manual con el dueño de casa. DUENO DE CASA Informacion del uso y mantenimiento en la pagina 4. 509S 509SMX 508, 508MX, 509 4. Sufficient air is needed for proper combustion and exhausting of gases through the flue chimney of fuel burning equipment to prevent backdrafting. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National Fire Protection Association NFPA, and the American Society for Heating, Refrigeration and Air

Conditioning Engineers ASHRAE, and the local code authorities. 5. When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities. 6. Ducted fans must always be vented to the outdoors. 7. If this unit is to be installed over a tub or shower, it must be marked as appropriate for the application. 8. Never place a switch where it can be reached from a tub or shower. 9. This unit must be grounded. TO REDUCE THE RISK OF A RANGE TOP GREASE FIRE 1. Never leave surface units unattended at high settings. Boilovers cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings. 2. Always turn hood ON when cooking at high heat or when cooking flaming foods. 3. Clean ventilating fans frequently. Grease should not be allowed to accumulate on fan or filter. 4. Use proper pan size. Always use cookware appropriate for the size of the surface element. Drill, electric or ratchet drive. High quality caulking compound 4. Se requiere una cantidad de aire suficiente para la combustión y escape de gases por la chimenea del equipo que quema combustible para prevenir la retrogresión de la llama.

Siga las especificaciones y estándares de seguridad para equipos de calefacción del fabricante, tales como los publicados por la Asociación Nacional de Protección Contra Incendios NFPA por sus siglas en inglés, y la Sociedad Americana de Ingenieros de Calefacción, Refrigeración y Aire Acondicionado ASHRAE, y los códigos de las autoridades locales. 5. Cuando corte o taladre en una pared o cielo raso, no dañe los cables eléctricos u otras instalaciones no visibles. 6. Los ventiladores con conductos deben ser siempre ventilados hacia el exterior. 7. Si esta unidad va a ser instalada sobre una banera o ducha, debe ser marcada como apropiada para dicha aplicación. 8. Nunca coloque un interruptor donde pueda ser alcanzado desde la banera o la ducha. 9. Esta unidad debe ser conectada a tierra. PARA REDUCIR EL RIESGO DE INCENDIO DEBIDO A GRASA ACUMULADA EN LAS HORNILLAS 1. Nunca deje sin atender las unidades de superficie cuando tengan ajustes altos. Los reboses pueden provocar humo y derrames grasos que se pueden incendiar. Caliente lentamente el aceite en un ajuste bajo o medio. 2. Siempre ENCIENDA la campana cuando cocine con alta temperatura o cuando cocine alimentos que se puedan incendiar. 3. Limpie con frecuencia los ventiladores. No debe permitir que la grasa se acumule en el ventilador ni en el filtro. 4. Utilice un sartén de tamaño adecuado. Siempre utilice el utensilio adecuado al tamaño del elemento de superficie. Taladro o perforador. Masilla de sellar de alta calidad 2. Before servicing or cleaning unit, switch power off at service panel and lock the service disconnecting means to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service panel. 3. Installation work and electrical wiring must be done by a qualified persons in accordance with all applicable codes and standards, including fire-rated construction codes and standards. 2.

www.telsercom.com/wp-content/plugins/formcraft/file-upload/server/content/files/16272cda1517a1---bridge-inspection-and-maintenance-manual.pdf

Antes de limpiar o de poner en servicio la unidad, apague el interruptor en el panel de servicio, y asegure el panel de servicio para evitar que se encienda accidentalmente. Cuando el dispositivo para desconectar el servicio eléctrico no puede ser cerrado con algún tipo de traba, sujete fuertemente al panel de servicio, una etiqueta de advertencia prominente. 3. El trabajo de instalación y el alambrado eléctrico deben de llevarse a cabo por personal calificado de acuerdo con todos los códigos y las normas aplicables, incluyendo los códigos y normas de construcción contra incendios. If you have questions, contact the manufacturer at the address or telephone number listed in the 509 warranty. Outside housing flange is fastened to casing strips 1 x 2's. See Fig. 1. If sheathing behind siding is not wood, provide extra supports between walls nailed or screwed to siding. PREPARE FAN 1. Remove motor assembly by loosening mounting screws, rotating assembly and lifting motor assembly out of inner housing. FIG. 2 2. Use care when handling motor bracket assembly to prevent damage to blade. Page 3 11. Insert outer housing through hole on outside wall and nail or screw housing to casing strips. Caulk all around filler strips and flange. FIG. 9 12. Run

wiring to fan location. Pull wire through both sleeves. FIG. 10 Insert inner sleeve into opening and fasten sleeves together with three black sheet metal screws provided in plastic bag. 13. Attach wiring to wiring box with proper connector for type of wire being used. Drop box into opening in housing. 14. Page 4 USE AND CARE USO Y MANTENIMIENTO DISCONNECT ELECTRICAL POWER SUPPLY BEFORE SERVICING FAN. Always unplug the fan motor before servicing the fan. The motor is permanently lubricated and will never need oiling. Clean the grill in warm, soapy water. Use a mild detergent, such as a dishwashing liquid. As the leader in residential ventilation, we will confidently meet your needs.

It enhances your home's environment by improving indoor air quality and reducing noise while providing exceptionally clean carpets and other surfaces. Now cleaning can be accomplished while the baby is sleeping or the family is enjoying their favorite television show. We are continually seeking ways to provide the best quality, technology, style and care to our customers. In winter, ice dams can result from poor ventilation, and moist air in the home can condense on attic surfaces causing mildew, rotting wood and wet insulation. BROAN has the solution! Factory prestripped leads for easier installation, streamlined bimetallic sensing strip allowing for more finger room for the installer and quadrex mounting screws all lend themselves to fast and easy installation. All feature powerful, permanently lubricated motors in rugged steel housings. Attractive low profile white polymeric grilles can be painted to match the surrounding wall colour. Efficient ventilation for a variety of applications. We work as a team to build momentum, we tackle every challenge along the way, and we share a clear vision of our mutual success at the end of the road. We follow a systematic approach to identify customer challenges, develop innovative solutions, and ensure that they are expertly planned and flawlessly implemented. We pledge to listen, learn and be helpful to every customer need; to act honorably and always deliver as promised. Our teams are dedicated to technical excellence so that we can work intelligently to find the right solutions for our customers needs. Enter your email if you're happy for us to contact you.
